Professional Summary

I believe that challenges help us grow, which is why I consistently push myself to try new things even when I'm scared. With hands-on experience working on a student management system and a gym website, I've learned that building solutions requires a mindset focused on understanding user needs and evolving with feedback. My goal is to join A2SV because I see it as an intensive learning opportunity that can sharpen my skills, much like gymnastics sharpens the body, especially in effectively mastering data structures and applying those concepts to real-life problems.

Work Experience**Web Developer | Dinosaur Gym | Around Abo | [Dat**

- Collaborated with a friend to challenge ourselves to design and develop a comprehensive website for a gym.
- Gained valuable insights into structuring projects and understanding client needs.
- Enhanced my ability to think from the customer's perspective, leading to a more user-friendly product.
